

SCENARIO

TABLES

Make any space more useful.

Scenario tables open up a world of possibilities everywhere work happens. They're easy to put up and move around, and even easier to break down and put away. Seamless technology integration and a versatile range of shapes, sizes, surface materials, and accessories let you handle any setup, task or gathering. Plus, Scenario goes with other innovative Kimball Office products, giving you even more ways to create interesting, functional and flexible workplaces.

Product specifications:
Scenario: Frosty White laminate, Platinum Metallic bases
Seating: Event mobile, Twilight Chartreuse, Platinum Metallic finish

Be ready for anything.

Scenario tables make every event, even those spur-of-the-moment situations, easy to accommodate. Intuitive ganging and flip mechanisms and smooth-rolling casters make these tables a snap to arrange and rearrange.

Act fast.

Scenario rolls – or glides – into action quickly. Base choices include static, mobile, and nesting in either platinum metallic or cinder.

And when it's time to clear the room, they quickly and easily tilt and nest for compact high-volume storage – thanks to their light scale and full-length release bar.

Find the perfect fit.

Scenario's adjustable base lets you go from sitting to podium height – and anywhere in between – in seconds. All without cranks to turn or pins to pull out and line up.

Simplify things.

Scenario moves in and out of use quickly and smoothly. Simple ganging and flip mechanisms let you set up and store the tables in straight-line arrangements.

Keep laptops safe.

A built-in lock port lets you secure computer equipment against theft.

There's no need to remove modesty panels or disconnect cabling. And should you need to, you can flip up any top to access power/data without uncoupling the other tables.

Make tight connections.

Scenario's unique ganging mechanism uses a simple male-female hitch for tool-free connections and a flush table-to-table fit that stands up even under heavy use.

Be up and running in minutes.

Scenario features a superior electrical system that lets you run power and hook up technology in no time flat. The undersurface electrical channel lets you daisy-chain up to six tables with a non-sequential electrical system.

Or a multi-circuit eight-wire system can be hardwired where code requires. All these components install without tools and with the tops flipped up, reducing installation time.

Receptacles are always accessible and power can run from table to table.

- Multi-circuit electrical

Manage wires.

Grommets, undersurface electrical channels, and leg-attached cable managers route cables to and from the tabletop.

● Single-circuit electrical

Plug in and power up.

Tabletop power/data modules offer immediate plug-and-play accessibility. A building power in-feed attaches directly to the wall, eliminating “cable snakes.”

Make room and save space.

Fit-anywhere dimensions, flip-top cabling access, flush table-to-table ganging and convenient in-line storage: Scenario lets you set up training spaces with ease and efficiency.

Create a supportive environment.

Scenario responds readily to individual needs. This compact, D-shaped table provides an extra surface for overflow projects, brainstorming sessions, quick meetings, or whatever the workday demands.

Bring people together.

Scenario gives you beautiful, durable meeting tables and accessories, including a trainer's cart and markerboard/flip-chart holder, to help people get more out of every interaction.

Settle for more.

Scenario tables have a versatile range of sizes, shapes, surface materials and accessories that expand your space planning options. Plus, they set up and break down easily and are GREENGUARD® certified for improved indoor air quality.

e-magine it with Scenario. To help you plan, specify and visualize your new offices, ask your Kimball Office representative to bring it to life with our e-magine software. You can review finishes, floorplans and more.

CAD Details from Kimball Office makes design easy. Just go to our website, and you'll find furniture symbols that can simply be dragged and dropped into your CAD-based program. Inspiration, in the form of floorplans, renderings and product photos is also available.

Sustainability is important to us. Kimball Office and our parent company Kimball International, have a longstanding commitment to sustainable practices in all of our operational, design and manufacturing procedures. This commitment is reflected in a wide range of management decisions, from using wood waste to heat our buildings, to making wise material choices, building durable products that can be reconfigured and upgraded, and working with voluntary organizations such as the Green Building Council, which is dedicated to education and promotion of sustainable building practices. At Kimball Office, sustainable practices make good sense, and good business.
